Dear Valued Customers,

As we head into 2026, we want to thank you for your continued trust in National Chimney. Your partnership drives our mission to deliver superior products and service as the only veteran-owned leader in the chimney manufacturing industry for over three decades.

This year is already off to a strong start with the launch of our new Chimney Defender Meredith Next Gen product line at the NCSG Show—where it was honored with the 2026 Pete Luter Innovation Award for Best New Product. This recognition reflects our commitment to developing solutions that truly make a difference in the field, and we're just getting started. We have additional Chimney Defender Meredith Next Gen innovations in the pipeline that we're excited to bring to you soon.

We also continue to invest in our operations to better serve you. Our Indianapolis Corporate Headquarters has expanded by 25,000 sq ft to enhance manufacturing capabilities and support our new products, while our Maryland and Vermont facilities are optimized for even faster deliveries.

This catalog features new and exclusive products inspired by your feedback, along with a calendar of events where we hope to connect with you in person. Your voice remains critical to our progress, and we invite you to participate in a quick 5-minute survey at the end of this catalog. As a thank you, you'll receive $50 off your next order.

Beyond manufacturing, National Chimney proudly supports industry organizations like NCSG, CSIA, HPBA, and regional guilds. We are also deeply committed to giving back through initiatives such as Sweep Away Cancer, which we are proud to help found, and Warrior Horse—both causes that are close to our hearts.

We look forward to a strong year ahead and continued success for chimney professionals everywhere. Thank you for being the foundation of our success. Your partnership inspires us to keep pushing forward, and we're honored to serve you.

Darin Bibeau, CEO **Evan Havers,** President

Your Guide to *Using the e-Store*

Getting Started

1. Visit **NationalChimneyStore.com.**
2. Click “Create a new user for your account.”
3. On the next screen, enter your account number and billing ZIP code. This information is available on any invoice or statement.
4. Once verified, you’ll be prompted to input your desired login details.
5. Click “Create Login”—and you’re in!

Account Support

Under **“My Account”** in the navigation panel, you can update: Address, Contact Info, Password, Saved Credit Cards, Shipping Addresses, and Shipping Accounts

For assistance, call 800-897-8481

Navigation Tips

1. If the left **navigation panel disappears**, click the three-bar menu icon in the top left corner to bring it back.
2. To **lock/unlock the navigation panel** in view, click the lock icon at the top right corner of the panel.
3. To **return to the homepage** at any time, click the National Chimney logo in the top left corner of the screen.

Ordering Products

There are multiple ways to access product listings.

From the Top of the Homepage:
Under the “Products and Ordering” section you can select: Shop, Price List, Recently Viewed Products, Favorites, Bulk Add to Cart *(best if you know your part numbers)*

From the Left Navigation Bar:
Click “Products” to expand a full drop-down menu, which includes all the options above and more.

Orders & Shipments

Go to “Orders & Shipments” in the left navigation panel or on the homepage. A drop-down menu will appear with the following options:

- All Orders
- Backorders
- Completed Orders
- Products Ordered *(Detail/Summary of Quantity)*
- Shipments

Accessing Your Cart

You can view your cart two ways:

1. Cart Icon – Click the shopping cart icon in the top right corner of any page. A menu with your cart contents will appear on the right side.
2. Navigation Bar – Click “Ordering” in the left navigation panel, then select “My Shopping Cart.”

View Your Invoices

In the left navigation panel, click “Invoices.” You’ll be able to view Open Invoices, Paid Invoices, and Products Invoiced. To make a payment click “Payments & Credits.”

Use the drop-down to:

- Pay an Invoice
- View Past Payments
- View / Apply Credits

Waterproof Protection for Chimney Crowns

Next Gen Crown Repair creates a seamless waterproof shield that keeps water out for good, stopping leaks and restoring crowns that last a lifetime. Engineered for crown repair & resurfacing, new crown construction, exterior chimney corbels, and more.

1 gal: $81.98 **2 gal:** $155.32

Permanent Protection for Chimney Flashings

Next Gen Flashing Repair seals and protects vulnerable areas with a permanent, hybrid moisture-cure formula that bonds to metal, brick, stone, and roofing materials—creating a watertight barrier.

1 gal: $79.86

Long-term Waterproof Protection for Chimneys

Next Gen Water Repellent penetrates deep into masonry chimneys, walls, and concrete surfaces to stop water intrusion while allowing trapped moisture vapor to escape naturally. Provides long-lasting protection with a breathable, invisible barrier.

5 gal: $208.49

A Safer Way to Remove Dangerous Creosote

Glazed Creosote Remover is engineered to chemically soften, absorb, and release glazed creosote—drying up to 50% faster than traditional systems, dramatically decreasing the risk of chimney fires and hidden flue damage.

25 lb: $195.68

The Smart Alternative to Repainting

VaporPass™ Breathable Masonry Coating combines the beauty of paint with the performance of a breathable protective coating, concealing discoloration, staining, patchwork repairs, and aging masonry while protecting against weather exposure.

1 gal: $114.58

Built-In Water Protection for Longer-Lasting Masonry

Unlike traditional powder additives, Liquid Water Repellent Additive mixes quickly, disperses evenly, and when paired with Chimney Defender Water Repellent creates stronger, more durable, and more uniformly water-resistant masonry.

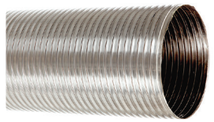

½ gal: $41.76

M-FLEX
LINERS & KITS
MANUFACTURED BY NATIONAL CHIMNEY

M-Flex

Standard Liner Kit

M-FLEX standard liner kits are used for wood, oil, coal, and gas appliances. Our .006” (CB) standard kits comes with installation instructions and a lifetime warranty. This lining kit has been installed in venting applications since 1992 and continues to be the most popular “all fuels” kit we offer. We stock 3”- 8” inside diameter (ID) as well as 6”- 8” outside diameter (OD) in our .006” (CB). OD kits are the same price as ID kits, just add OD to the part number when ordering. (For example: CB625KITOD) Every job is unique, therefore if you need a larger plate size top kit add $5 to the cost of the kit and specify when ordering. All standard tees have a snout length of 10”. Extended snouts are also available. Call for details.

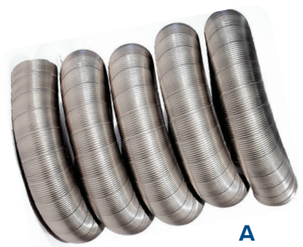

KIT INCLUDES:

A **Stainless steel liner** UL 1777 Listed and Tested all fuel 316 .006” (CB)

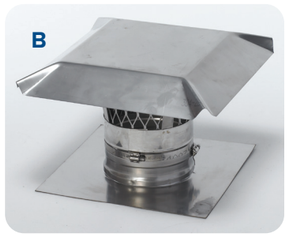

B **Top kit** which includes a rain cap, and a 13”x13” top plate

C **Two-part tee** with removable 10” length take off (snout) 316

D **Tee end cap** 316

M-Flex

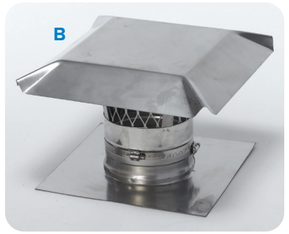

Basic Liner Kit

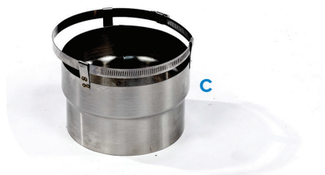

Made with the same upstanding quality as our CB Standard Kit; this kit is specialized for fireplace insert applications where a tee and tee end cap are not needed. This kit has been outfitted with our stove adapter designed by those in the field. Made to accept our liner into the top female end with our EZ clamp to tighten it in place. The stove adapter slips into the top of the stove or insert's collar for an easy transition to the stove or other application.

KIT INCLUDES:

- **A** **Stainless steel liner** UL 1777 Listed and Tested all fuel 316 .006" (CB)
- **B** **Top kit** which includes a rain cap, and a 13"x13" top plate
- **C** **Stove adapter**

M-Flex

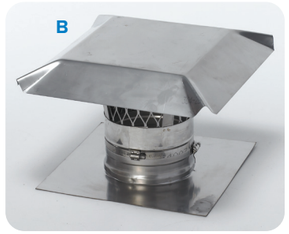

Pellet/Corn Liner Kit

The pellet/corn kits are similar to our Standard Kits and our Basic Kits. The primary difference is the short body tee that goes at the bottom of the liner. Each pellet tee is designed specifically to connect our liner to the pellet stove. Insert the liner into the top of the tee body, tighten the clamps, and put the snout around the outside of the pellet stove opening.

KIT INCLUDES:

- **A** **Stainless steel liner** UL 1777 Listed and Tested all fuel 316 .006" (CB)
- **B** **Top kit** which includes a rain cap, and a 13"x13" top plate
- **C** **Pellet tee**
- **D** **Tee end cap** 316

	3"	4"
25'	CB325KITP $427.33	CB425KITP $450.31
35'	CB335KITP $514.37	CB435KITP $516.35

The 3" pellet tee (NC3FXTPSB) accepts 3" liner and has a 3" diameter snout that is 2.5" long. The 4" pellet tee (NC4FXTPSB) accepts 4" liner and has 3" diameter snout.

M-Flex

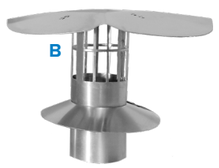

Aluminum Liner Kit

National Chimney manufactures our M-FLEX aluminum liner kits for appliances with A.F.U.E. of 83% or lower.
Each aluminum kit comes professionally packed, includes installation instructions, and come with a 25-Year Warranty.

KIT INCLUDES:

- **A** **2-ply Aluminum Liner**
- **B** **Mortar collar** aluminum
- **C** **Aluminum cap**
- **D** **Top plate** aluminum, 16"x16" plate and 2" high collar around the hole diameter

M-Flex **316** Liner

M-Flex liner is made from 316L stainless steel and is designed to reline existing chimneys or to be used in new construction. National Chimney manufactures the M-FLEX liner from the highest grade mill certified stainless steel alloy. It is made from a continuous strip of 7-ply stainless steel that is interlocked and crimped to produce a gas and watertight lining system of superior strength and durability. Its corrugated construction allows for expansion and contraction during heat up and cool down periods, removing any stress on the system.

- Made from .006” stainless steel, thicker and stronger than standard .005” liner.
- Lifetime transferable warranty when properly maintained by a chimney professional.
- UL listed (UL1777, UL64, UL441) for insulation and approved for all fuel types: wood, coal, oil, corn, and gas.

M-FLEX liner is available in interior dimension (ID) and outside dimension (OD)

Example	INSIDE	OUTSIDE
6” ID Liner	6”	6¼”
6” OD Liner	5¾”	6”

TAKE NOTE:
Standard liner lengths of 20’ and longer include a 5% discount.

6, 7, & 8 inch diameters are also available in OD. For ordering OD liners, please add “OD” to the end of the item # above. For Example, CB625OD

MANUFACTURED WITH .006 (CB) THICK STAINLESS STEEL LINER UL LISTED UP TO 40" DIAMETER. CALL FOR PRICING ON 13"- 40".

Please Note: *Prices do not include a coupler.*

WHY CUSTOMERS LOVE NATIONAL CHIMNEY

> National Chimney has been our supplier of choice for over 15 years. **Quality craftsmanship, superior technical support, and first-class customer service.** Their commitment to assisting in our success has been unmatched. We couldn’t ask for a better relationship with a supplier.”
>
> **- Rick Anderson,** *Anderson’s Chimney*

VETERAN OWNED

SERVING YOU FOR OVER 30 YEARS NATIONAL CHIMNEY

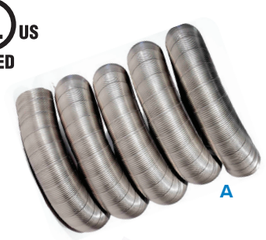

Smoothwall

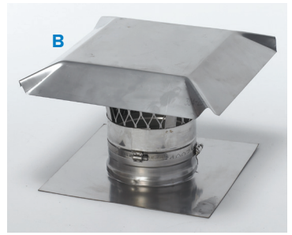

Standard Liner Kit

M-FLEX Smoothwall Standard Liner Kit is used for the same applications as the standard M-FLEX Liner Kit. However, the Smoothwall Standard Liner Kit offers superior flexibility with a higher BTU capacity. Each Smoothwall Standard Kit comes with installation instructions and a lifetime warranty. We stock 3” - 8” inside diameter (ID) kits.

KIT INCLUDES:

- **A** **Stainless steel liner** UL 1777 Listed and Tested all fuel 316 .006” (CB)
- **B** **Top kit** which includes a rain cap, and a 13”x13” top plate
- **C** **Two part tee** with removable 10” take off (snout) 316
- **D** **Tee end cap** 316

Smoothwall

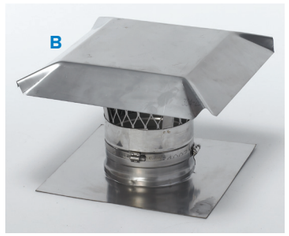

Basic Liner Kit

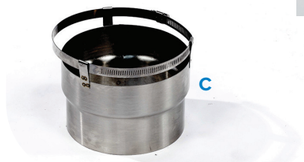

Made with the same quality as our Smoothwall Standard Liner Kit; this kit is specialized for fireplace insert applications where a tee and tee end cap are not needed. This kit has been outfitted with our stove adapter. The stove adapter accepts our liner into the top female end with our EZ clamp to tighten it in place and slips into the top of a stove or insert collar.

KIT INCLUDES:

- **A** **Stainless steel liner** UL 1777 Listed and Tested all fuel 316 .006” (CB)
- **B** **Top kit** which includes a rain cap, and a 13”x13” top plate
- **C** **Stove Adapter**

Smoothwall

316 Liner

National Chimney’s Smoothwall Liner (SW) has superior flexibility with a high BTU capacity. Its smooth interior allows for more airflow, reducing drag by 20% over traditional corrugated liners. Smoothwall is made from 2-ply 316 stainless steel which makes it ideal for any application. It is compatible with our all fuel components as well as our wood or wood pellet components.

SMOOTH INTERIOR DESIGN ALLOWS MORE AIR FLOW

PRE-INSULATED M-FLEX LINERS WITH STAINLESS OR ALUMINUM OUTER SHELL

National Chimney offers pre-insulated M-Flex chimney liners with your choice of Stainless or Aluminum outer protective liner. The Aluminum outer liner offers better flexibility and ease of handling, whereas the Stainless Steel outer liner offers durability. Both are manufactured using our highest quality, mill certified 316L Stainless Steel M-Flex inner liner and our 1/2" insulation wrap. This convenient liner will save you time and frustration on the job. Most liners can ship FedEx Ground. Liners of 8" or larger diameters ship via common carrier. These liners are also available in our Standard and Basic Kits.

Pre-Insulated

Finishing Plug

This plug is used to complete the chimney termination of a Pre-Insulated Liner. The collar with the band on the outside fits over the outer liner. The smaller collar is designed to accept the inner liner. To finish the installation, you can purchase a "Top Kit Rain Cap" which easily connects to the smaller collar with the same EZ Band Clamp connection. Made from 24ga 304 stainless steel.

Pre-Insulated

Stove Adapter

This adapter is used to connect the Pre-Insulated Liner to your wood stove or insert. The Pre-Insulated liner fits fully into the large end of the adapter and the EZ Band Clamp secures the liner in place. The small end collar is crimped to fit inside the appliance’s stove collar. Made from 24ga 304 stainless steel.

Pre-Insulated

Liner Coupler

This coupler is used to join (2) pieces of Pre-Insulated Liner together. It is designed to provide a dripless connection having both a female and a male end. The EZ Clamp Bands on both ends of the coupler ensures a secure connection on both ends of the liner. It is made from 24ga 316 stainless steel so it can be used for wood, oil, gas, and coal applications.

Premier Flex Heavywall

316 (PRL) & 304 (PR) Liners

c UL us LISTED

Premier Flex is extremely durable and made from .015 Stainless Steel. It features an interlocked design to maximize strength and flexibility. It's the most rugged liner we recommend for those tight winch-able situations. Premier Flex 316 can be used for all fuel burning appliances including; wood, wood pellet, oil, gas, and corn. Premier Flex 304 can be used for wood burning appliances. Premier Flex can withstand being ovalized and rectanglized to accommodate for unusual offsets or rectangular chimneys. When a liner is taken “out of round” it does reduce the cross sectional area. If you need help sizing a liner, please call 800-897-8481.

**Not available in a kit; components are sold separately.*

PREMIER FLEX LITE

As the chimney industry changes, National Chimney adapts to fulfill our customers' needs. Premier Flex Lite Liner has the same quality and technology as our standard Premier Flex Liner except it is much lighter. It is constructed of .010" thick steel as opposed to the standard heavy wall .015" thick steel. Each Premier Lite Kit comes with instructions and a lifetime warranty.

Premier Flex Lite

316 (PRL) & 304 (PR) Liners

c UL us LISTED

As the chimney industry changes, National Chimney adapts to fulfill our customers' needs. Premier Flex Lite Liner has the same quality and technology as our standard Premier Flex Liner except it is much lighter. It is constructed of .010" thick steel as opposed to the standard heavy wall .015" thick steel. The thinner steel has the durability of the heavy wall liner but at a more manageable weight. Offered in 304 and 316 L/Ti. See our M-Flex Smoothwall Chimney Liner, if you need a liner that reduces sizing by 20%.

M-FLEX ALUMINUM LINER & KITS

National Chimney manufactures our M-FLEX aluminum liner kits for appliances with A.F.U.E. of 83% or lower.

Each aluminum kit comes professionally packed and includes:

- UL Listed and Tested 2-ply aluminum liner
- Aluminum mortar collar for slipping the liner through the thimble
- Aluminum top plate with a 16”x 16” plate and a 2” high collar around the hole diameter
- Aluminum cap, and installation instructions

All M-FLEX aluminum liner kits come with a 25-Year Warranty and are listed to UL441.

Direct Vent Kit

The Aluminum Direct Vent Kit is designed to vent any direct vent/Co-Linear gas-fueled appliance. This kit includes your choice of a low profile Co-Linear cap and flashing or a high wind Co-Linear cap with flashing and either two 3” diameter. aluminum chimney liners or one 3” and one 4” diameter aluminum chimney liner. Also included are EZ clamps for attaching the liner. These kits come with a 25-Year Warranty.

Aluminum

3003 Liner

National Chimney’s 2-Ply 3003 aluminum liner can be used to vent Category I gas appliances with A.F.U.E. of 83% or lower. In many cases, especially when only water heaters are vented into masonry flues, the gas appliances are vented into oversized flues. This practice may cause serious condensation and performance problems. By relining the chimney with National Chimney M-FLEX aluminum liner you can reduce the condensation problem and improve the performance of the appliances.

Aluminum **Low Profile** Co-Linear Kit

Low Profile Co-Linear Caps and Kits—A sleek and unique cap with an installed height of just 7”. Our Low Profile Co-Linear Cap is manufactured using the highest quality commercial grade aluminum. This cap comes with a 3” air intake and has the option of a 3” or 4” exhaust. EZ connect bands connect. the liner to each collar, eliminating the need for screws and rivets. Each Low Profile Cap comes with a standard 13” x 13” flashing. (an 18” x 18” flashing is also available.) .

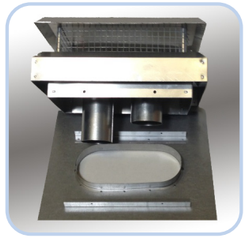

Transferable Lifetime Warranty for Stainless Steel; 25-Year Warranty for aluminum.

Stainless Steel

Direct Vent Kits

The Stainless Steel Direct Vent Kit is a great option for upgrading your gas-fueled co-linear appliance. They can be used with Wood Pellet inserts that require an air intake. This kit includes your choice of a Stainless Steel low profile cap and flashing or a Stainless Steel high wind co-linear cap and flashing. You also hace a choice of one 3” Aluminum air intake liner and one 3” Stainless Steel exhaust liner or one 3” Aluminum air intake liner and one 4” Stainless Steel exhaust liner. Included are EZ clamps to connect the liners to the cap. These kits offer a Lifetime Warranty for Residential use on all Stainless Steel parts (25-Year Warranty for Commercial use). The Aluminum air intake liner has a 25-Year Warranty.

Stainless Steel **Premier Rigid** Lining System

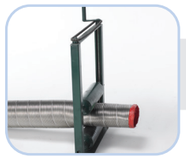

The Premier Rigid Lining System is constructed of high grade, 24ga stainless steel. Available in 316 alloy (SSL) for all fuel applications and 304 alloy (SS) for wood burning applications. To ensure the tee fits properly use an "OD" tee. Rigid liner systems also require the use of a standard top plate, top clamp, storm collar and liner rain cap.

WHY CUSTOMERS LOVE NATIONAL CHIMNEY

"As someone who has been in the industry over the last 25 years, I can honestly say that **National Chimney Supply has been a true PARTNER throughout the years.** They have always been an effective and reliable provider of materials and tools. I have no issue with flat out saying they are the best! **But in addition to that, and what has kept our relationship so good over the years, has been their leadership and support in our industry's education and training.** To me, the business relationship that has been built since 1998 (when I got into the chimney business) is immeasurable as far as its value.

- Ryan Hall, *Winstons Chimney*

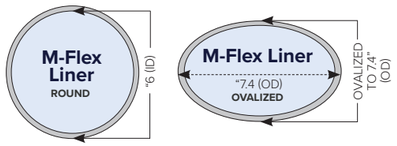

The Dimensions of an Ovalized Liner

READING THE CHART

1. Find the original round liner diameter in the first column
2. Select the smaller oval side you need along the top of the chart
3. Follow the row across and column down to find the large side dimension

EXAMPLE

6” Liner Ovalized Down to **5” = 5” X 7.4”**

	4”	5”	6”	7”	8”	9”	10”	11”
12” IN² = 113.14			17.3” 79	16.75” 86	16” 93	15.5” 99	14.25” 102	13.5” 106
11” IN² = 94.99		16.1” 65	15.5” 72	15” 78	14.1” 83	13.5” 87	12.6” 92	
10” IN² = 78.50	16” 50	15” 57	14” 63	13.25” 68	12” 72	11.3” 76		
9” IN² = 63.58	13.1” 43	12.5” 50	12” 53	11.1” 56	10.4” 61			
8” IN² = 50.25	11.6” 36	11” 42	10.3” 45	9.5” 48				
7” IN² = 38.46	10” 32	9.2” 34	8.3” 36					
6” IN² = 28.25	8.1” 24	7.4” 25						

SIZING FOR FIREPLACES

1. Measure fireplace opening Width × Height
2. Divide by 12
3. Select a liner with equal or larger square inches

EXAMPLE

36" × 28" = 1008
1008 ÷ 12 = 84 in²
Select liner with area ≥ 84 in²

Premier Flex Heavywall

Custom Rectangle or Square **Sizing Chart**

Unusual sized chimneys need unusual sized liners. National Chimney Custom Sheet Metal Shop will fabricate any liner on this chart with custom fit components to match. Made from .015 Stainless Steel. While determining what custom flex you need, please note the TWO different types available:

PR (304): wood and wood pellet applications
PRL (316): all fuel applications

READING THE CHART

1. Locate the small side dimension of the rectangle on the left side of the chart.
2. Follow that row across until you find the desired large side dimension.
3. From that column, move down to the bottom of the chart to find the price per foot for the liner material.
4. Multiply the price per foot by the total liner length needed to calculate the total price.

EXAMPLE

8.5” x 9.5” rectangle liner costs:
$50.88 per foot *304 Stainless Steel*
$73.94 per foot *316 Stainless Steel*

LARGE SIDE — Original Liner Diameter

SMALL SIDE	6	7	8	9	10	11	12	13	14	16	18

CHIMNEY COMPONENTS

Round Stainless Steel Components

National Chimney components are made from high quality 24ga 316 (L) or 24ga 304 steel. Couplers are fabricated without clamps (standard) or with clamps on both the female and male ends (EZ). Bottom plates come standard with 18ga 304 stainless base plate and a 5" high 24ga collar. National Chimney nose cones are designed to fit over the liner. National Chimney has a full custom shop for complex applications.

SERVING YOU FOR OVER 30 YEARS NATIONAL CHIMNEY

WHY CUSTOMERS LOVE NATIONAL CHIMNEY

"I would like to take a few minutes to discuss my experience and relationship with Michael and the entire National Chimney Supply team. We have been in business in Baltimore for nearly 40 years and have been exclusively purchasing supplies from National for the last 10 years. **The customer service is outstanding and is an excellent resource for ordering and any general questions.**

Deliveries are prompt and Bryce does an outstand job getting out ordered items into our warehouse. Michael has delivered emergency request for materials in his personal vehicle that day to our shop. My previous supply partners would not even have considered this. **Mike has been a great sounding board and source for professional advice over the years and has helped our business grow.**

- Cullen Davis, *Clean Sweep Chimney, Gutter & Slate Service*

STACKED TEES

When should I use an OD tee?

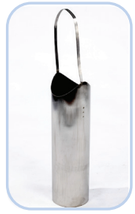

OD tees are used for stacking tees, putting two tees on top of each other. The OD tee is always used as the bottom tee. The top of the OD tee will accept the bottom of either an ID or OD tee. If an ID tee is used on the bottom, the two tees will be too loose due to the expansion of the top of the ID tee. OD tees are used when ordering a specific OD M-FLEX Liner.

When there is a liner between two tees, make sure both tees (2 ID tees) are the same (to accommodate the liner).

Double Take-Off Swivel Tee

This style tee has two take-offs with a unique feature of the tee body having the capability to spin 360°. This enables both take-offs to act independently of each other and allows you to position each take-off to whatever angle is required. **Standard 2 inches between the take-offs.** This tee has all the standard features of our regular two-part tee with removable take-offs and EZ Band Connection at the top of the tee. Made from 24ga 316 stainless steel.

Swivel Top Tee

This swivel top tee has a top liner connection which spins 360°. During liner installation it is sometimes difficult to get the tee body connection to align properly with the thimble. The advantage to this swivel feature is you can spin the tee body from the thimble without having to turn the entire liner from the top of the chimney. This tee will save valuable time from having to turn the liner by hand at the top of the chimney. This tee has all the same features as our standard 24ga 316 and 304 style tees.

FLUE FIT PREMIER TOP KIT TKFF

Top Kit Extensions

The Top Kit Extension is a section of rigid pipe made from 24ga 304 stainless steel that can be used to extend the height of the chimney to gain additional draft capacity for a poor performing chimney. Used in conjunction with our National Chimney Top Kit, simply remove the rain cap section from the top kit and install the rigid section inside the collar of the EZ Top Plate. Tighten the EZ Clamp around the collar of the EZ Top Plate securing the rigid section to the top plate making one complete unit. The extension piece has a bead connection at the top to attach the rain cap.
Offered in 18” and 24” lengths. Top plate & rain cap not included.

Stainless Steel

Adjustable & Fixed Elbows

are available in 3”– 8” diameters. Elbows are used for rigid and outside diameter “OD” flex pipe or for inside diameter “ID” flex pipe in a multitude of degrees. Manufacturing our own elbows allows for a top quality product with an unsurpassed fit. So the next time you have a tricky installation that requires the versatility of an adjustable or fixed elbow, call National Chimney for your solution.

Increaser/Reducer for All Fuel Applications

Increaser/Reducer

National Chimney does not crimp our reducer/increaser so you can choose which end needs crimping for your application. Reducer/Increasers are available in 304 (wood and wood pellet applications) or 316 (all fuel applications). Choose from a 3 piece/tapered design for maximum flow or our plug style for tight spots. National Chimney offers a reducer made specifically for pellet stove installations. The 4”- 3” pellet reducer is also available as a 3 piece/tapered design or plug style. The 4” female end attaches to the outside of our M-FLEX or Smoothwall Liner then goes directly to the outside of the 3” pellet stove opening.

Please Note: For “Plug Style” reducers/increasers, add a “P” to the part # above. For example, NC43R/IP. These reducers/increasers are made to fit our Rigid Lining Systems. For connecting to all other liners, please order an ID coupler to transition from the liner to the reducer/increaser.

ORDERING OVALIZED TEES AND NOSE CONES?

You need to know what your ID (Inside Diameter) or OD (Outside Diameter) of the round liner (before the liner is ovalized). For example, if the liner was a CB625 (which is ID) and it was ovalized down to 5”, you would need an ID tee = NC65OVFLEXT. If the liner was a CB625OD (which is OD) you would need an OD tee = NC65OVTEE.

HOW DO I CONNECT TWO PIECES OF OVALIZED LINER?

We ovalize our couplers with the liner for an exact fit every time, so if you need a coupler just order the coupler that would fit the round liner and ask us to ovalize it with your liner. For example, if you ordered an 8” ID liner, you would need to order an NC8C (in 304 for wood applications) or NC8CL (in 316 for all fuel applications). If it was an 8” OD liner then you would need an NC8COD or NC8CODL.

OVRD(L)

OVAL TO ROUND ADAPTER

The oval end of the adapter is made to accept ovalized Inside Diameter (ID) liner. The round bottom end is crimped and made to go into stovepipe or inside the stove’s collar.

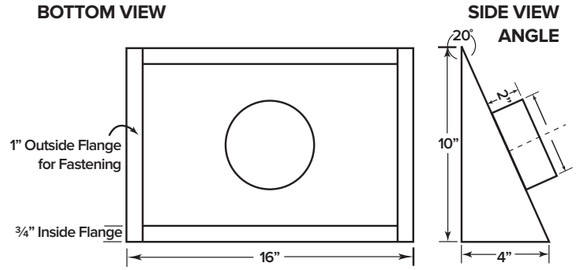

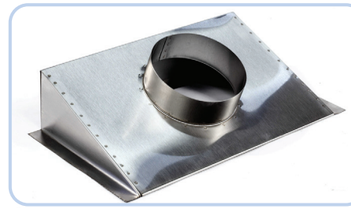

If you are running liner between the tees, then you will need to order an extra tee, the same as the first one ordered to accommodate the liner.

4-3 PELLET ADAPTER
NC43R/IPELLET1: **$40.95**

Insert Boot

National Chimney manufactures insert boots with 24ga 304 stainless steel. They are designed to attach rigid pipe or flexible liner with a coupler to the exhaust vent of most inserts.

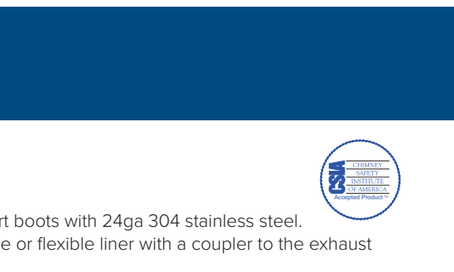

6”	NCSS6B $115.32
7”	NCSS7B $116.20
8”	NCSS8B $125.77
Small Oval measures: 4.5”x10.5”	NCSSSO $134.05
Large measures: 4.5”x13.5”	NCSSLO $138.79

Insert Adapter

National Chimney manufactures a unique insert adapter that allows a front-to-back or a side-to-side adjustment in the firebox. The two piece design allows it to slide to adjust the center-to-center distance of the collars. This accommodates a horizontal offset from 0” to 9” without the added clearance required for elbows. The top collar accepts OD flex liner or rigid pipe. It will also accept ID pipe in conjunction with a coupler. The bottom collar will fit into most stoves that require a crimped connection. Attaches with screws or rivets like most liner or pipe. Custom adapters are also available with clean-out door.

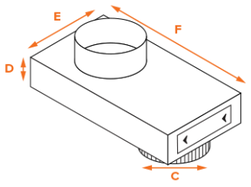

C 5”	NC5IA $116.84
C 6”	NC6IA $125.24
C 8”	NC8IA $137.97

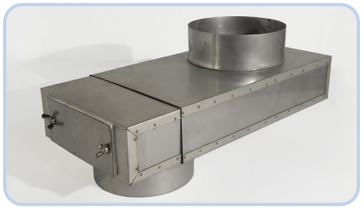

Stove adapter required to connect to M-FLEX Liner.

Liner Insert Adapter

Item	A	B	C	D	E	F

3322	8⅜” ID	2¼”	7-¹⁵/₁₆”OD	3⅛”	10¼”	16-¹⁵/₁₆”
Offset Adjustments from 6” to 12”						

National Chimney manufactures a unique Insert Adapter that allows a front-to-back and side-to-side adjustment in the firebox. The two-piece design allows the unit to slide to adjust the center distance between collars. The 6" adapter when fully closed has a 6" center-to-center measurement and when fully extended has a 12" measurement between the collars. The 8" adapter has a 7" measurement between the centers of the collars and a 12" distance between collars when fully open. The top collar on both 6" and 8" adapters accepts "I.D." Flex Liner and the bottom collar is crimped to fit into most stoves or inserts. Made from 24ga 304 stainless steel this adapter attaches with self-tapping screws or rivets. Clean-out door comes standard.

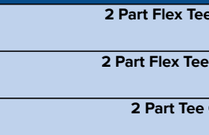

C 6”	NC6IAN $125.24
C 8”	NC8IAN $137.97

Custom sizes available.

Oval Components for All Fuel & Wood Applications

Oval components are made in-house to fit any M-FLEX or Premier Flex ovalized liners. When deciphering what parts you need, the first number is the round liner size. The second number is what it is ovalized down to.
(Example: NC65OVNC=National Chimney 6" ID round Wed down to 5" Nose Cone) See Dimension Sizing Chart.

NATIONAL CHIMNEY™

CUSTOM PARTS

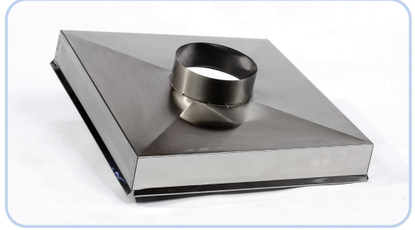

National Chimney is the leader in manufacturing custom components for all of your needs. Our custom shop is geared to meet your requirements in a timely fashion and give you quality parts at competitive prices.

**Custom Products do not qualify for free shipping.*

The Industry's LEADING Custom Shop.
If You Can Draw It, We can Build It!

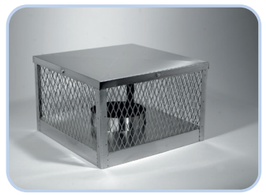

CUSTOM TEE
Choose:
- Removable or Rigid Snouts
- Body Length
- Snout Length
- Number of Snouts and Sizes

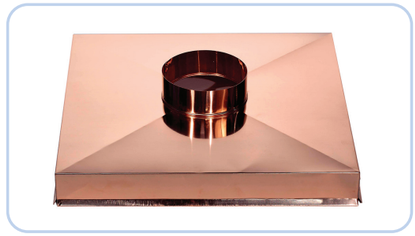

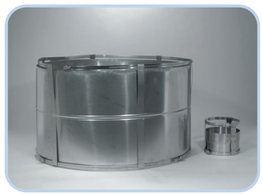

CUSTOM TOPS
Choose:
- Top Size
- Lid Style, Round or Square
- Screen Height

CUSTOM CAPS
Choose:
- Overall Dimensions
- Screen Height
- Number and Location of Holes

CHASE COVERS
15-year Warranty on Aluminum, Lifetime Warranty on Stainless Steel
Choose:
- Overall Dimensions
- Skirt Height
- Number and Location of Holes
- Copper or Stainless Steel

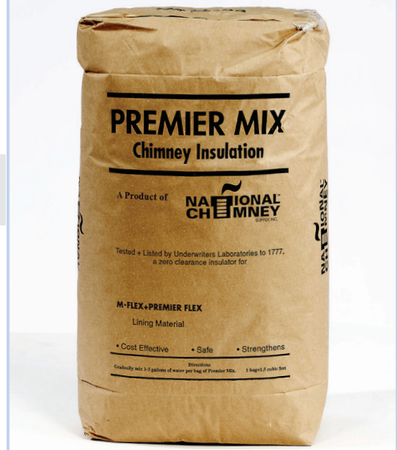

CUSTOM COUPLER
Choose:
- Sizes
- Slide IN or EZ Band Connection

Premier Mix Insulation

Premier Mix insulation is a UL listed (to 1777), ready mix vermiculite based masonry material containing no asbestos. It helps keep heat in and allows the flue to stay warmer causing less creosote build up and less condensation in gas and oil applications.

**This Product does not qualify for free shipping.*

26 LB. BAG:
PRMIX: **$41.33**

PREMIER MIX PREPARATION INSTRUCTIONS

Simply prepare by gradually adding 2 to 4 gallons of water. The product is properly mixed if when squeezed in your hand, it will hold together, no water should come out. Pour the mix around the chimney liner and let it solidify.

AREA OF ROUND LINERS IN SQUARE INCHES

C	3”	4”	5”	6”	7”	8”	9”	10”	11”	12”
	7.07	12.56	19.63	28.26	38.46	50.25	63.58	78.50	94.99	113.14

Two Other Types of Insulation Available:

VERMICULITE
VER: **$49.50**

PREMIER MIX SIZING INSTRUCTIONS

Please use the following calculation as a guide. Keep in mind there may be voids or irregularities in the chimney you cannot see.

STEP 1: Multiply the inside dimensions of the chimney flue, e.g., 13” x 13”.

STEP 2: Subtract the area of the liner to be installed in sq inches (see charts above).

STEP 3: Multiply that number by the height of the chimney in feet.

STEP 4: Divide by 216.

= Total number of bags of premier mix you will need to insulate the chimney.

Premier Wrap **Insulation** w/ 4 ml Foil

Premier Wrap Insulation comes with an 8 lb. density ceramic blanket and a durable 4 ml foil backing. Available in ¼" thickness which achieves a 1" clearance to combustibles and a ½" thickness providing a zero clearance requirement. Both are offered in 24", 30", 36" and 48" width by 25' and 35' long rolls. Please see the chart on the next page to assist you in ordering the correct width blanket for the corresponding diameter liner. Insulation comes in 25' or 35' lengths, so if your liner exceeds these lengths please order accordingly. The premier wrap is also available in a non-foil faced blanket that is 1" thick x 24" wide.

			1/4" W/4ML FOIL	1/2" W/4ML FOIL	1" NON-FOIL

WHEN TO INSULATE...

	Insulation (Required for UL Listing)	Recommended for Better Results (Not Required for UL Listings)
Solid Fuels ***(Wood, Pellet, or Coal)***	1" Premier Mix Insulation Or ½" Premier Wrap Insulation	1" Premier Mix Insulation Or ½" Premier Wrap Insulation
Gas	Not Required	Insulating the chimney liner will improve the performance of the appliance it is connected to. Insulating the liner will reduce condensation—especially on startup. Recommend ¼" Premier Wrap Insulation or any thickness Premier Mix Insulation.
Oil	Not Required	Insulating the chimney liner will improve the performance of the appliance it is connected to. Insulating the liner will reduce condensation—especially on startup. Recommend ¼" Premier Wrap Insulation or any thickness Premier Mix Insulation.

All wood, wood pellet and coal applications require insulation, while it is recommended with oil and gas appliances, it is not required. Insulate our liners with either Premier Mix, a vermiculite based poured insulation, or with Premier Wrap, a foil-faced ceramic wool blanket, to meet UL 1777 standards for chimney exteriors with zero clearance to combustibles.

Heat Fab 22Ga Single Wall Black Stovepipe And Components

(ALSO KNOWN AS SAF-T-LINER)

It's made from 22ga .030 cold roll steel with 100% laser or advanced resistance-welded seams. It is 60% thicker pipe than most hardware store brands and it guarantees a completely sealed seam which means no smoke or flue leakage. It is designed for interior use only, to vent coal or wood burning appliances. Available in a full range of parts and sizes individually wrapped and packaged for FedEx.

Round to Oval Adapters

Here is the solution to connect 8" round 22ga single wall black stovepipe to the stove. The centerline adapter is 11 1/2" high with a round female end accepting 8" pipe and an oval male end 53/8" x 93/4". The offset adapter is 93/4" high with a round female end accepting 8" pipe and an oval male end 53/8" x 93/4".

DSP Double Wall Pipe

Most commonly used as interior connector pipe. The connector is an important component of a wood burning system because correct size, arrangement and installation improve the performance and safety of a heating system.

FEATURES:

- It has an inner liner of 400 series stainless steel and outer black painted surface made of durable aluminized steel separated by a ¼" inch air space. This keeps the flue temperatures higher and the outer pipe temperatures cooler
- Double wall construction withstands temperatures up to 1200ºF of continuous operation.
- Can be installed with only a 6" clearance to combustibles. (Single wall stovepipe requires 18" clearance to combustibles).
- Listed and Tested to ULC Standard S-641 and UL-103 standards.

INSTALLATION HINTS:

- The 6" and 8" diameters are ID (inside diameter measurements.
- For installed length, remember to subtract 1-3/8" per joint.
- The minimum clearance to combustibles is 6".
- The maximum recommended length of double wall black stovepipe should not exceed 20'. Per the installation instructions, reduce the maximum limit by 10% for every 90º bend or 5% for every 45º bend.
- The orientation of all chimney connector components must be with the crimped end (outer black pipe) pointing up, towards the chimney towards the chimney. Inner pipe, orient with crimped end pointing down into the appliance flue outlet.
- All joints between sections of the chimney connector must be secured with (3) sheet metal screws (supplied) per joint.
- The black surface of the chimney connector may be ouched up with high temp flat black stove paint.

Selkirk Model Ultra-Temp Class A

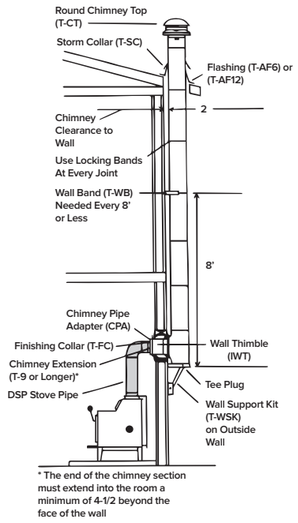

This Multi-Fuel system is ideal for venting residential appliances, burning natural and LP gas, #2 oil, and wood. It’s specially designed for today’s modern, high efficiency “airtight” wood stoves (solid fuel wood burning fireplaces). Selkirk has a smooth inner liner that produces rapid stabilization for strong draft and heats fast to minimize condensation as waste gases are exhausted. The outer casing carries structural loads leaving the inner pipe free to expand without stress. Tested to 2100° F, a high temperature test option of Underwriters’ Laboratories safety standard for factory built chimneys, UL-103 sixth edition. Heavy duty stainless steel is used for all system components. This lightweight pipe has threaded internal couplers that lock together with an ⅛ turn. Locking bands included with every pipe.

1 Masonry Fireplace Using Selkirk Chimney

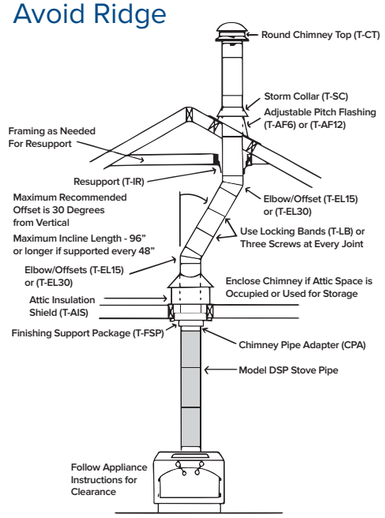

2 Basement Heater with Tee-Supported Outside Chimney

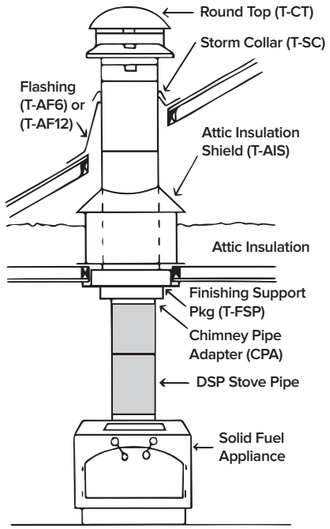

* The end of the chimney section must extend into the room a minimum of 4-1/2 beyond the face of the wall

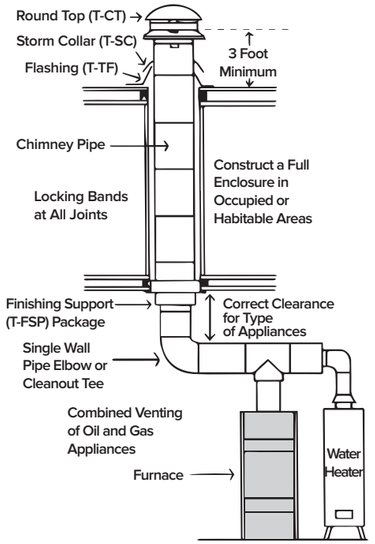

3 Wood Stove with Chimney Offset to Avoid Ridge

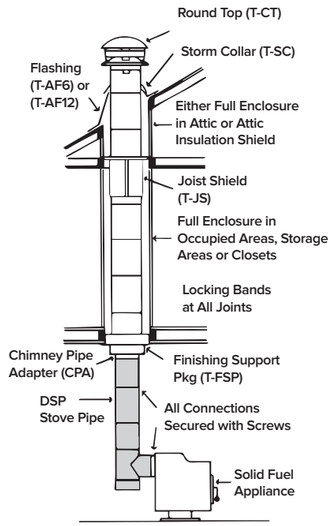

4 Solid Fuel Appliance with a Short Vertical Chimney

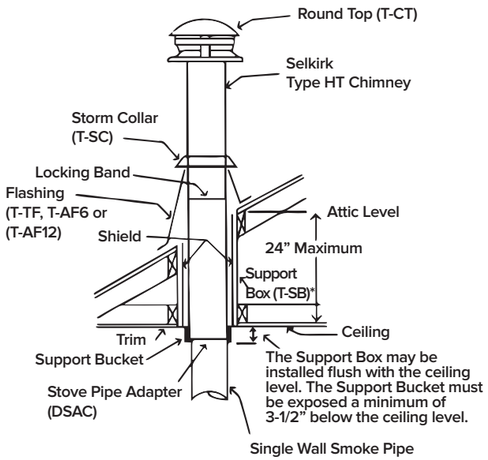

5 Combination of Furnace & Water Heater on One Chimney

6 Wood Heater with its Chimney Through an Upstairs Enclosure

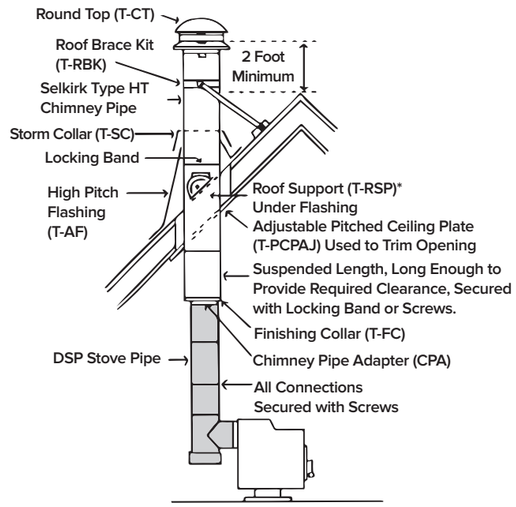

7 Pitched Roof with Attic

*Support box also intended for use in mobile home A-frame installations.

8 A-Frame with Chimney on a Steep Pitch Roof

*Support box may also be used. Please consult installation instructions for more information.

FIRESTOP/JOIST SHIELD

Used in floor/ceiling penetrations other than those which include a ceiling support. Not required when passing through the roof.

DRIPLESS SMOKE PIPE ADAPTERS

Used to connect single wall pipe to Ultra-Temp Selkirk insulated chimney pipe. It's designed to slip inside the single wall stove pipe to contain any creosote dripping down the chimney to the inside of the pipe system. Choose the DSA for use in retrofit installations and the DSAC (includes coupler) for use in new installations.

Premier Top Mount Multi-Flue Caps

Premier Multi-Flue Caps are available in virtually all lengths and widths and four standard heights: 8”, 10”, 12”, and 16”. Our most popular sizes have special, discounted pricing which is already calculated in the table below. Note: The lid extends 3” beyond the side of the cap. So for example, a 9” x 9” cap would have a lid that is 15” x 15”.

If you don’t see your size listed, please call us at **800-897-8481.**
**Custom Sized PT Caps do not qualify for free shipping.*

Our Multi-Flue Caps have a top mount design that attaches easily to the top of the chimney crown or brick with chimney top adhesive and tapcons (included with each cap). All caps have a hinged mounting system to provide extra space when the fit is tight. Note: Caps wider than 33” require a lid support—provided by National Chimney.

The multi-flue cap has a top mount design that easily attaches to the top of the chimney crown or brick with chimney top adhesive and tapcons (included with each cap). All Premier Top Mount Multi-Flue Caps have a hinged mounting system that gives extra space for a tight fit.

TAPCONS 1/4 X 1 1/4 (100/PKG)
FAPTTAPCON: $37.98

Top Mount-Flue Cap Design

All caps come with ¾” mesh to keep sparks in and critters out.

The 4 bolts and serrated flange locknuts (nut/washer combo) hold the sides together and the lid in place.

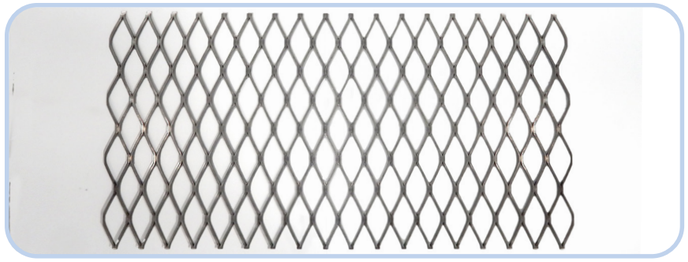

Caps have top bolts on the top and screen ends that attach to the screen box.

Premier Top Multi-Flue Caps are available in all sizes.
If you do not see the size you need, please call us at 800-897-8481.

Stainless Steel Mesh for Caps Replacement

Custom lengths & widths
Call for pricing.

Hip & Ridge Caps

Hip and Ridge Caps are made from 24ga 304 stainless steel. They are available in knock-down style or pre-assembled. Hip and Ridge Caps come with a 4” overhang on all four sides and a hinge flange on the bottom. They are designed with the lid secured to the frame from underneath which results in a leak proof lid.

Powder coating and copper are available upon request. Please call 800-897-8481.

Pitched Skirt Style Multi-Flue Caps

Pitched Skirt Style Multi-Flue Caps are made from 24ga 304 stainless steel with a removable lid. The lid extends beyond the sides of the skirt. The standard skirt size is 3” and the pitched section on top is 2” long. All custom sizes and heights are available between 9” - 33” wide and 9” - 84” long.

Powder coating is available upon request.
Please call 800-897-8481 .

Premier Stackable Single Flue Caps (4 Pack)

- Highly Durable Sizes ranging from 9” x 9” to 18” x 18”
- Designed for Single Flue Masonry Chimneys
- Works for Wood, Pellet, Oil, Gas, and All Other Fuels
- 304-Alloy Stainless Steel Construction with ¾” rust resistant Mesh
- Base & Mesh are 18-gauge; Lid is 24-gauge
- Single-Piece Base and Screen Frame—for added strength
- Heavy-Duty Screen—keeps out critters and debris
- Easy to Assemble and Install
- Removable Lid with Open Screen Frame—makes for easy access and maintenance
- Attaches directly to the chimney’s flue tile—to protect both the flue and crown
- Lifetime Warranty

Powder Coated Caps

Powder coating available. Call for pricing.

Due to the recommended 6” minimum clearance necessary for proper drafting from the highest protrusion (i.e. top of flue tile, liner or chimney) to the cap lid, there are several heights to choose from. For example: Flue tile extends up 6” from the crown of the chimney. To calculate the required clearance, add 6” to get a mesh or screen height of 12” needed. Another recommendation to gain the required clearance is to cut down the flue tiles using a disc grinder.

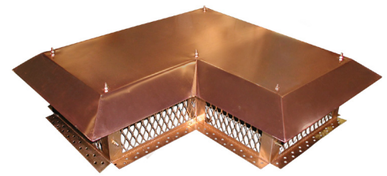

**Custom Sized PT Caps do not qualify for free shipping.*

Custom Caps

Custom Caps available. Call for pricing.

HY-C Universal Covers

These covers fit 95% of masonry flue tiles. They are available with ¾" mesh and ⅝" mesh to meet California code. The secure inside anchoring system is ideal for windy conditions. Available in both black and stainless, adjustable so one size cover is able to fit several flue sizes, reducing sizes needed on hand. The 13" x 13" cover will fit flues from 7" x 7" to 13½" x 13½" and will work on square, round or rectangle flues. The 13" x 20" cover will fit rectangular flues from 7" x 14" to 13" x 20½" and 13" x 13" square. All covers are 304 stainless steel and will work on extended flues or flues that are flush.

WHY CUSTOMERS LOVE NATIONAL CHIMNEY

> I have been installing National Chimney Supply's manufactured products for over 25 years. It's not just a high quality product that sets National Chimney above the rest, it's the whole package. Reaching out to customer service to place an order and you KNOW you and your business are in the right hands for success. They hand it off to skilled craftsman that manufacture the highest quality products in the industry. **Orders filled to ship are loaded with care by some of the best in the business that never overlook any detail.** The delivery team communicates and takes great care getting the product to your doorstep. **Let's not forget the endless sponsorships and educational opportunities National Chimney serves up for us all on a regular basis! All one cohesive machine working towards your success in the chimney industry.**
>
> **- Dana M. Storrs,** *DM Storrs Chimney LLC*

HY-C Single Universal Flue Caps

Constructed of 18ga 304 Stainless Steel with a 8" high ¾" expanded stainless steel mesh (⅝" mesh also available). These caps mount to the outside of the flue tile providing greater free air space for better draft. HY-C leg kits attach cap to the inside of the flue if your flue tile doesn't extend above the crown.

Premier Damper Cap

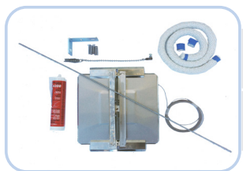

National Chimney's Premier Damper Cap is made of 304 stainless steel with a Lifetime Guarantee. All Premier Damper Caps have a removable lid for easy access for cleaning. The lid is 15% larger, giving more protection from the elements limiting ice and snow build-up even in the harshest weather. It has an insulated lid with ½" thick insulation sandwiched between 2 pieces of 24ga 304 sheet steel to provide extra protection from condensation. Premier Damper Caps are made standard with ¾" expanded mesh screen and are also offered in ⅝" California Mesh. Comes with a 50' cable, handle, and silicone.

Top Damper

The Top Damper seals out rain, snow and sleet while sealing in “paid” heat and air-conditioning. In its closed position it is virtually invisible from the ground. The stainless steel and aluminum design ensures that it won’t rust or stain your chimney. But the most exciting benefit of The Top Damper is that it doesn’t require a chimney fire safety device. In addition, we have taken some weight out of the lid allowing this damper to open higher than the competitions’. Installation is easy! Just use the adhesive to attach the damper at the top, then simply drill two holes and use the nail anchors to mount the bracket in the firebox. The mounting hardware consists of adhesive, 30’ stainless steel cable, fireplace bracket, anchors, spring handle, lid-release pull and even an allen wrench. You may use the Energy Top Adapter Ring, if desired. Just drill attachment holes in the damper frame for mounting. The RS Adapter may be used to adapt The Top Damper to a round liner or solid-pack Class-A pipe. Extra hardware packs are also available. The Top Damper carries a Limited Lifetime Warranty.

8” x 8”	TD88 $196.54	13” x 13”	TD1313 $206.40
8” x 17”	TD817 $250.00	13” x 18”	TD1318 $269.74
9” x 13”	TD913 $199.83	18” x 18”	TD1818 $320.74

Note: No safety device (fusible link) is needed, as the lid is aluminum and will melt in the event of a chimney fire.

Top Damper +

The Top Damper + comes with a premium quality stainless steel cap to provide spark protection and defend against animal/debris. Its special design seals out rain, snow, and sleet while sealing inside heat during the winter and A/C during the summer. Installation is quick. The damper frame secures to the top of the chimney with a high-temperature adhesive. Included are installation instructions, high-temperature adhesive, a 30’ cable, firebox mounting bracket, handle, and hardware. The Top Damper + carries a Lifetime Warranty.

Energy Top Damper

The Energy Top Damper is a low-profile top mounted damper that also serves as a chimney cap. In the closed position, it is virtually invisible from the ground. It provides a tight, gasketed fit that seals heat. The Energy Top Damper seals out weather, insects, birds and animals. A slight pull on the chain releases the spring-loaded top into the open position. When open, this damper design is least obstructive to exiting smoke. Damper includes a Lifetime Warranty, 30' cut-to-fit cable, fireplace bracket, cool touch spring handle, mounting adhesive and hardware. ***Do not use on chimneys venting gas logs.***

Energy Top + Damper

The Energy Top + Damper is about 90 percent more efficient than traditional dampers. Install at the top of the chimney and completely seal the flue shut with a flexible silicone rubber gasket when the fireplace is not in use. Energy Top + Dampers prevent heat from escaping up the chimney and chilly drafts from entering the home. The Energy Top + not only is a top sealing damper, but it also serves as a chimney cap/spark arrestor.

Sealtight Damper

This is a great option for homeowners who don't want a cap visible on their chimney. The Sealtight Damper attaches to the top of the flue. It provides a tight gasketed fit to seal out weather, insects, birds and other animals while keeping heat in. (This damper can also be installed beneath a HY-C chimney cap.) Each damper kit includes a Lifetime Warranty, 30' cut-to-fit cable, fireplace bracket, cool-touch spring handle, mounting adhesive and hardware. ***Do not use on chimneys venting gas logs.***

The Access Plate is used with the Sealtight Damper for easy removal of damper for sweeping.

Lock-Top Damper (LT)

Lock-Top damper seals out pests and weather problems. It is a low-cost solution to replace throat dampers to help prevent heat and air conditioning loss from your customer's home. Damper includes 30' cable, adhesive, mounting hardware and Lifetime Warranty. ***Do not use Lock-Top dampers with gas logs.***

WEATHERSHIELD

Chimney Cap Model WSA

A unique alternative to the traditional chimney cap. Its 304 stainless steel construction assures superior corrosion resistance to weather and the hostile flue gas environment. Despite adverse weather, the WeatherShield will not rust. For use with solid pack Class A, masonry, and single wall chimneys keep out rain, snow, leaves, and animals, but keep sparks in. **Larger sizes available, call for quote.**

FOR 11”, 12” WEATHERSHIELDS, TDW’S & OS
ICSS19: $114.52

VACU-STACK Caps

The premier chimney cap for solving common wind-related chimney draft problems, Vacu-Stack caps protect the chimney from rain, snow, debris, and animals. The Vacu-Stack is made to fit solid pack Class A, Masonry, or Single Wall Chimneys.

Stop down drafts and smoking caused from:

- Mountain winds in homes near slopes
- Wind deflected by tall trees
- Erratic, turbulent wind around buildings or other obstructions
- Appliances vented through the side of buildings

It is made of 304 stainless steel and available in 3" - 16" round diameters and in 8" x 12" and 12" x 16" rectangular sizes. To install, simply slide the Vacu-Stack into the pipe and seal with a high temperature silicone sealant. **Available in 316 Marine and Copper, call for quote.**

VACU-STACK Model TDW

With its purpose the same as the original Vacu-Stack, this model is specifically designed for use with double or triple wall air-cooled or air-insulated chimneys. The new one-piece Vacu-Stack TDW design for air cooled chimneys is now leakproof because it is self-flashing. This new design eliminates the need to caulk and seal the VSS unit to the termination cover. **Larger sizes available, call for quote.**

HEARTH ACCESSORIES

Premier Refactory Panels

Cut to fit Refractory Panels are manufactured using the highest quality materials available in the industry. Reinforced with a stainless steel structural lath for strength and durability. Supplying our customer with top quality products is imperative to National Chimney. Refractory Panels require freight truck transport.

Always use the following safety materials when cutting refractory panels because refractory dust can cause eye and lung irritation:

- Safety glasses
- Gloves
- Dust Mask

See index for safety glasses, gloves, and dust masks.

Skamol Panels

Skamol panels are an attractive, factory-built panel replacement option. Not only are they easy to work with but they feature a three dimensional appearance. Easy to cut and easy to install. Makes for a quicker, cleaner installation. Dimensions: 1” x 24” x 39 ⅝”.

- Lightweight vermiculite
- Cuts with a standard handsaw
- Superior insulation value
- High mechanical strength
- Thermal shock resistance
- No ceramic fibers or dust

SKB: $112.60

HERRINGBONE PATTERN
SKH: $112.60

REMOVAL AND CUT-TO-FIT INSTRUCTIONS

Safety gear is recommended when removing or installing refractory panels. See Index for Safety Items.

**This Product does not qualify for free shipping.*

Curing Information

The panels require curing by exposing them to very low heat for a short period of time, 5 to 6 times. This ensures all the moisture is eliminated from the panel to prevent future cracking.

FIRST AID PROCEDURES

INHALATION: Go into an area that is dust free; seek medical attention if problems persist.

EYE CONTACT: Go into an area that is dust free and flush eyes with water for a minimum of 15 minutes.

SKIN CONTACT: Wash skin thoroughly.

DIAMOND BLADES

Use these wet or dry to cut the refractory panels.

4.5" x .080" General Purpose	**LDSLG04580P**	$32.50
4" x .250" Tuck Pointing	**LDTPSG04250P**	$47.50
4.5" x .250" Tuck Pointing	**LDTPSG45250P**	$81.90
7" x .090" General Purpose	**LDTSLG07080P**	$55.00

BACK REMOVAL AND INSTALLATION

1. Removing back refractory panels require working slowly and being careful not to break fragile old refractory panels. Make sure to remove the side that does not have the gas line. Unscrew the retaining clips, located at the top and front of the panel.
2. Lift the panel out of the firebox.
3. Measure the length and height of the refractory panel. Mark your cut to fit panel and cut using a circular saw masonry blade.
4. Using retaining clips, install the new refractory panel.
5. Reinstall old side refractory panels with retaining clips
6. *See note above for important information regarding curing.*

SIDE REMOVAL AND INSTALLATION

1. Unscrew the retaining clips of the panel you want to take off on the top and front of the panel.
2. Mark the cut to fit panel with the desired length and height dimensions. Cut panel using a circular saw masonry blade.
3. Using retaining clips, install the new refractory panel.
4. *See note above for important information regarding curing.*

BOTTOM REMOVAL AND INSTALLATION

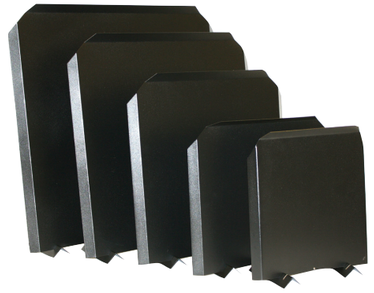

1. Starting with the side panels and end with the bottom panel, remove all panels from firebox.
2. Use the factory edge towards the front of the firebox and measure bottom panel. Cut panel to determined measurements.
3. Install panel with the factory edge towards the front of the firebox.
4. Install the back and side panels.
5. *See note above for important information regarding curing.*

HY-C Firebacks

Firebacks protect the structural integrity of the fire box. They shield masonry from ⅓ of the heat that may cause damage. Firebacks increase energy output by reflecting heat & light back into the room. HY-C Firebacks have a lighter stainless steel construction which makes them less expensive and easier to place than cast iron firebacks. All HY-C firebacks have a slotted base which allows for adjustable installation (65° to 90°).

**Be advised: paint will burn off with use.*

15" x 15" Stainless Fireback Painted Black	**FB1515**	$71.72
16" x 18" Stainless Fireback Painted Black	**FB1618**	$92.08
20" x 20" Stainless Fireback Painted Black	**FB2020**	$124.06
24" x 24" Stainless Fireback Painted Black	**FB2424**	$157.34
27" x 27" Stainless Fireback Painted Black	**FB2727**	$182.22

Smokeguards

Most fireplaces smoke because the opening is too high. Smokeguard lowers the fireplace opening, holds in smoke, and easily corrects the problem. *Available in brass and black to fit fireplaces 28½" to 48" wide.*

American Panel

Hearth Products

American Panel Hearth Products Type II hearth pads. Built and tested to the new UL1618 Standard that was effective 2011. These hearth pads offer both ember protection and thermal protection. Built with a solid ¼" thick (at bottom) aluminum frame for strength, non-combustible substrates for safety, mechanically fastened into frame for strength, no carpet removal required – easier and quicker installation. Manufactured and assembled in the USA.

HY-C

Stoveboards

HY-C Company UL-Listed Stove Boards and Hearth Extenders protect your customer's floors from the intense heat, hot coals, ashes, and soot that wood stoves and fireplaces produce. They can also be used under other heating appliances such as kerosene, gas, and electric heaters. UL-Listed stove boards may be used as a wall shield to reduce a wood stove's clearance necessary to combustibles while protecting the walls from heat. Items and prices shown here are for black. Tile gray, woodgrain patterns, and additional sizes are non-stock, but available upon request.

Minuteman

Cast Iron Door

COD88 & COD1212

COD812

Made of heavy duty cast iron, this door displays a glowing fire on its exterior. There are three sizes available:

8"X8" (OD= $10^{1/2}$"X$10^{1/2}$")
COD88: $55.09

8"X12" (OD= 11"X$17^{1/2}$")
COD812: $115.35

12"X12" (OD= $15^{1/2}$"X$15^{1/2}$")
COD1212: $147.98

Ashpit Door

Drop this cast iron door in the bottom of your customer's fireplace so they can sweep away their ashes. Fits 4.5"x9" opening, outside dimension is approx. $5^{3}/_{8}$"x$9^{1}/_{2}$".

ASHPIT DOOR
AP49: $24.87

HY-C

Fireplace Grates

One piece cast flat bottom style grate with 12" depth, 5" height for use in small fireplaces and Franklin Stoves.

17" W
HYCG17: $124.71

22" W
HYCG22: $114.05

HY-C

Safe-T-Grate

Heavy duty self-feeding expandable fireplace grate. Safe-T-Grates are shipped knocked-down.

22" W
HYCGT22: $143.45

1200° Stove Paint

Resists peeling and blistering when subjected to temperatures up to 1200°F. Renews and protects finishes on steel or cast iron stoves, ovens, grills and cookers. Dries to flat black finish.

1200 SPRAY 12 OZ -12/CS 80: $13.43

A. W. Perkins

Stove & Grill Paint

Adheres to stainless and aluminum without primer. Won't peel or blister at 1400° F. Lower odor than competitive products. We stock in flat black but it is available in other colors, cases of 6. Call for a quote.

1400 SPRAY 12 OZ -12/CS
AWP90: $13.15

Stove Thermometer

Helps monitor stove temperature to reduce chance of creosote buildup. Ceramic face will not fade and the strong magnet holds the thermometer in place on the stove top, door or flue pipe.

STOVE THERMOMETER
RU701: $17.26

A. W. Perkins HearthGlass Creme

Mild abrasive and active ingredients combine to attack soot and creosote deposits on glass-ceramic windows of solid-fuel stoves and fireplace inserts. Silicone creates a slippery layer to make the next cleaning easier.
Not for tempered glass fireplaces.

HEARTHGLASS CREME
AWP101A: $5.23

A. W. Perkins Gas Fireplace Glass-Ceramic Cleaner

Dissolves white film build-up & soot on glass-ceramic windows of gas or wood fired heating appliances. Mild abrasive will not scratch glass-ceramics avoiding the micro-pitting of more aggressive products. This pitting leads to "hazy glass" & increases glass breakage.

8 OZ GFC CLEANER
AWP102A: $5.60

A. W. Perkins Big Stick Soot Remover

A 3 oz. Toss-in tube containing soot and creosote removing compounds. Enhanced with the addition of our Magi-color Flame Crystals it burns with a blue-green flame.

TOSS IN 3 OZ STICK
AWP210: $2.34

SaverSystems ACS Home & Hearth Cleaner

Home and Hearth Cleaner is an industrial strength cleaner. It is a high alkalinity citrus detergent, containing biodegradable surfactants which effectively cut through smoke and creosote. It safely removes smoke and creosote stains from fireplace glass, hearths, stoves, brick, stone, and more. Home and Hearth Cleaner combines the natural cleaning power of citrus with strong cleaning agents to tackle most tough household cleaning jobs. It is great for cleaning barbecue grills as well as clothing and equipment with smoke and soot. Home and Hearth Cleaner also works on walls, woodwork, kitchen surfaces and flooring and leaves no streaks or film. The product provides a quick easy way to clean while leaving a long-lasting scent of fresh oranges.

ACS HEARTH CLEANER
SSHHC: $8.63

SaverSystems Anti-Creo-Soot (ACS)

ACS is a non-toxic and environmentally safe liquid that attacks and destroys dangerous creosote and soot. Available in quarts or gallons. Encourage your customer to spray it daily into their fireplace or stove during low fire conditions. ACS will help prevent chimney fires and assist in cleaning the chimney more completely. It also controls excess ash and clogging in pellet stoves.

ACS 32 OZ. SPRAY BOTTLE
ACSQ: $11.81

ACS 1 GAL
ACSG: $32.92

ACS 16 OZ. SPRAY BOTTLE
(GAS LOG CARBON SOOT REMOVER)
ACSGL: $9.16

SaverSystems Brick & Mortar Cleaner

Designed for use on brick and masonry surfaces. It effectively removes smoke, rust, and creosote stains, as well as mildew and algae. Available in a 2.5 gal container, covers 50-150 sq ft per gallon.

2.5 GAL
SSBMC: $37.28

SaverSystems Paint "N" Peel Fireplace Cleaner

Paint on/Peel off. Cleaning smoke stains from your customer's fireplace front is just that easy. Now you can add cleaning smoke/soot stained fireplace fronts to your list of professional services. You paint it on and once dry, your customer peels it off. Their old, dingy fireplace front looks like new and there's no need for a return trip. The average job requires less than a gallon of Paint "N" Peel Fireplace Cleaner.

- Restores the appearance of nearly all masonry surfaces.
- Waterless–Simply paint on, let dry, & peel off.
- No noxious odors, no harsh chemicals.
- Tools clean easily with soap & water.

1 GAL
SSPPFC: $88.98

HY-C Soot Eraser

Absorb soot, fly ash, and dirt on brick mantles, painted walls, woodwork and window blinds with this natural vulcanized rubber sponge.

SOOT ERASER
SSSE1: $9.37

Rutland Stage One Creosote Remover

Turns creosote into a brushable ash in pellet stoves, wood stoves, fireplace inserts and free-burning fireplaces. Makes chimney cleaning easier and reduces the danger of chimney fires. Safe to use with all types of chimneys.

2 LB CONTAINER
AW2012: $10.28

Waterproof Protection for Chimney Crowns

Next Gen Crown Repair creates a seamless waterproof shield that keeps water out for good, stopping leaks and restoring crowns that last a lifetime. Engineered for crown repair & resurfacing, new crown construction, exterior chimney corbels, and more.

1 gal: $81.98 **2 gal:** $155.32

Permanent Protection for Chimney Flashings

Next Gen Flashing Repair seals and protects vulnerable areas with a permanent, hybrid moisture-cure formula that bonds to metal, brick, stone, and roofing materials—creating a watertight barrier.

1 gal: $79.86

Long-term Waterproof Protection for Chimneys

Next Gen Water Repellent penetrates deep into masonry chimneys, walls, and concrete surfaces to stop water intrusion while allowing trapped moisture vapor to escape naturally. Provides long-lasting protection with a breathable, invisible barrier.

5 gal: $208.49

A Safer Way to Remove Dangerous Creosote

Glazed Creosote Remover is engineered to chemically soften, absorb, and release glazed creosote—drying up to 50% faster than traditional systems, dramatically decreasing the risk of chimney fires and hidden flue damage.

25 lb: $195.68

The Smart Alternative to Repainting

VaporPass™ Breathable Masonry Coating combines the beauty of paint with the performance of a breathable protective coating, concealing discoloration, staining, patchwork repairs, and aging masonry while protecting against weather exposure.

1 gal: $114.58

Built-In Water Protection for Longer-Lasting Masonry

Unlike traditional powder additives, Liquid Water Repellent Additive mixes quickly, disperses evenly, and when paired with Chimney Defender Water Repellent creates stronger, more durable, and more uniformly water-resistant masonry.

½ gal: $41.76

Sealants & Creosote Remover

SaverSystems ChimneySaver Water Repellent

The most common problem with masonry chimneys is water penetration. Saver Systems water repellent can prevent all types of water damage, such as staining, loss of insulation value, freeze-thaw damage, deterioration, and ultimately structure failure. Available in Water or Solvent base including V.O.C. Compliant Solvent-base. Product is covered by a 10-year warranty. Covers approx. 100 sq. ft. per gallon.

WATER BASE (5 GAL)

SSCSSBC: $102.54

SaverSystems ChimneySaver Multi-Purpose Water Repellent

New Multi-Purpose Water Repellent can be used on a variety of substrates as well as on horizontal applications. Up to 1/4" penetration, creates a salt shield barrier on concrete, resistant to de-icing chemicals, 100% breathable, VOC compliant.

MULTIPURPOSE (5 GAL)
SSCSMP: $268.54

SaverSystems Powdered Water Repellent

Just add 1 oz to every 15 lbs. of dry mortar mixture, then add water. Provides water repellent properties when the concrete and mortar cures.

POWDERED (1 LB)
SSPWR: $42.27

SaverSystems All Weather CrownCoat Sealant (FORMERLY COLD WEATHER)

All Weather CrownCoat is a tough elastomeric coating that will cure in temperatures below freezing. This stops further water damage, even in the winter months. All Weather CrownCoat can be used in all weather and is available in 1 gallon pails – enough to do 3-4 average crowns. Light gray color.

CROWNCOAT (1 GAL)
SSCWCC1: $86.60

SIPHON PUMP (FOR 30 GAL)
SSSIPHON: $31.36

SaverSystems CrownSeal

This pre-mixed crown repair system forms a light gray, flexible, waterproof seal to protect the chimney crown. It is applied to the surface with a trowel or putty knife at a thickness of 1/8" - 1/4" (1/4" thickness yields 7-9 sq. ft. per gallon of coverage). Cures completely in 6-8 hours during warm weather or 24-72 hours in cooler weather. CrownSeal is available in 2 and 5 Gallon Containers.

CROWNSEAL (2 GAL)
SSCS2: $141.84

CROWNSEAL (5 GAL)
SSCS5: $310.87

SaverSystems CrownSaver

Use this durable waterproofer for the repair of Chimney Crowns. It covers approximately 30 square feet at ½" thickness (about 4 average crowns) when properly mixed. This product allows you to re-build and waterproof all at once. Option: can be used with form foil.

CROWNSAVER (5 GAL)
SSCR: $97.81

FORM FOIL (9"X50')
SSFF: $177.38

SaverSystems FlashSeal

FlashSeal is a long lasting flashing repair system designed to stop leaks from faulty or deteriorated flashings around chimneys, stacks, and vents. Available in Black, Brown, and White, it can be dyed to match your customer's roof. Simply apply FlashSeal with a brush around the area to be repaired, place a strip of reinforcement fabric over the base coat and apply another coat. (1) gallon covers 28 linear feet or 14 sq. ft. Reinforcement fabric is available in 6"x 150' rolls.

BLACK (1 GAL)

WHITE (1 GAL)
SSFSW: $73.95

REINFORCEMENT FABRIC (6"X150")
SSFSRF: $22.97

SaverSystems Cre-Away

By simply squeezing the 1 lb. bottle pointed directly up the flue near the top of the firebox, the powder is carried up the chimney coating the entire surface of the flue and enabling the ingredients to start working. It modifies third-degree creosote by converting it into a more brittle state. During the heating/cooling cycles the treated creosote loses its adhesive properties so it can be simply brushed away. Sprayer for use with 25 lb pail, sold separately.

Crown Safe

Spread it and forget it! Crown Safe is a high-performing, brushable elastic sealant, with rubber-like flexibility designed to stop water intrusion into masonry chimney crowns, roofs, and various other building surfaces. Crown Safe's fibered formula produces a clear, see-through finish which is extremely flexible and highly resistant to tears, shears, stress, and weathering. The unique properties of this product allow successful application in extreme weather, such as freezing and wet conditions. Preferred by chimney and roofing professionals for its versatility, Crown Safe is the ultimate water intrusion prevention system! Available in conveniently sized one (1) gallon containers, and features better product coverage than the competition at up to 80 sq. feet per gallon! Avoid those costly return visits with this one step, single component, crown repair product and get the job done right, the first time!

CROWNSAFE (1 LB)
USCS: $120.85

SaverSystems CrownCoat Brushable Sealant

This crown repair product is the brush-on version of CrownSeal. Using a 3" or 4" bristle paint brush, brush a thin coat over the entire crown, wait a few minutes for a tacky film to form, then brush on a second heavier coat. CrownCoat cures completely within 2 - 4 hours and is available in a 2 or 5 gallon container. This will cover approximately 80-200 sq. ft. or 40 sq. ft. per gallon. Available in standard color (very light Gray) or Buff, a color more resembling concrete.

Poultice Creosote Remover (PCR) & Applicator

PCR should be used where glazed creosote is present in order to eliminate the dangers of chimney fires. PCR is designed to completely remove 3rd degree glazed creosote from flue tiles or stainless steel chimney liners. When applied, it dissolves and absorbs the creosote allowing it to fall off the sides of the flue tiles. Any remaining PCR can be easily removed by chimney sweeping or with a specially designed applicator tool.

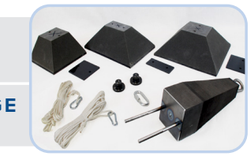

Applicator Package Includes:
- (1) RS 44 Pulling head
- (1) Pulling head connector kit
- (1) 12"x12" foam cut w/bottom plate
- (1) 8"x12" foam cut w/bottom plate
- (1) 8"x8" foam cut w/bottom plate

**Requires use of a winch system.*

HeatShield Tie Coat Accelerator

Tie Coat Accelerator is added to each 50 lb. bucket of HeatShield Cerfractory Flue Sealant to reduce the drying time of the tie coat application, allowing you to perform the resurfacing repairs sooner and save time on the job.

PAIL (4 LB)
SSHSTCA: $66.03

HeatShield Smoke Chamber Sprayer

This dual-guage smoke chamber sprayer is a low pressure, high volume system with a 3/4" hose. It gives users more control for applying the correct amount of material for various smoke chambers. The spray gun, made by MarshallTown can be adjusted to 7 different spray settings and includes a clean-out valve on top for easy cleanup. The sprayer must be used with a compressor with a minimum 5.0 CFM @ 60 PSI. Used for both SSPCR Poultice Creosote Remover and SSCF Smoke Chamber Sealant.

SPRAYER
SSSPRAYSC: $1,040.92

HeatShield PriorFire Formula 51

PriorFire Formula 51 is a smoke chamber restoration system designed to insulate fireplace smoke chambers for added safety, smooth jagged edges, corbels, and reshape the smoke chamber for increased fireplace safety and performance. This versatile product has a 20-year limited warranty and can be used to parge over masonry in smoke chambers to insulate from heat or cold, and it sticks to most anything. It's UL Listed zero clearance to combustibles when applied a minimum 1" thick to 4" nominal masonry. One of our customers described it as "the best parging product ever produced" try it and see if you don't agree.

PAIL (30 GAL)
SSFORM51: $79.33

HeatShield Cerfractory Foam Smoke Chamber Sealant

Repairs masonry smoke chambers easily. No need to remove the damper or flue tiles. Greatly improves draft efficiency while adding an extra layer to insulate the chimney from surrounding building materials. Applied with a basic sprayer. Exceeds ASTM & NFPA requirements. 20-Year limited warranty. Average smoke chamber requires 1-2 pails.

PAIL (3.5 GAL)
SSCF: $148.48

HeatShield Chamber Coat

Chamber Coat is a trowel/pargeable smoke chamber repair product designed to smooth out corbels and fill gaps in smoke chamber walls. It insulates, strengthens, and improves efficiency of fireplace smoke chambers. It meets both NFPA and IRC requirements for parge coating of smoke chamber walls with a refractory mortar that passes ASTM C199 Medium Duty (5 hours at 2550°F).

PAIL (5 GAL)
SSCHC: $53.50

HeatShield Cerfractory Flue Sealant

The HeatShield Flue Sealant & Repair System was developed to restore flue tile and masonry chimney interiors to their original integrity. In suitable chimneys, HeatShield can provide a very effective and durable repair system. It can be applied solely to open mortar joints, or a thin coating can be applied to the entire flue to fill joints, seal cracks and structurally reinforce clay flue lined chimney interiors. Invented in Europe, HeatShield's hybrid "cerfractory" technology contains no cement or lime. It combines the strength of a high fired ceramic with the heat resistance of high temperature refractory cement. HeatShield Cerfractory Flue Sealant is supplied as a dry powder that is mixed with tap water on the job site immediately before use. It air cures in about 48 hours and is ready for use. Restored flues are gas tight, moisture & acid resistant, with little to no effect on the functional cross sectional area of the flue.

PAIL (50 LB)
SSHSCFS: $279.49

Chamber Safe

Chamber Safe is a high performance, refractory parging material designed to strengthen, streamline, and restore the critical smoke chamber area in masonry chimneys. Chamber Safe smooths jagged, corbelled walls typically found in the smoke chamber, and creates a smooth transition between the smoke chamber, and flue liner.

(5 GAL)
LCS: $79.95

Rutland Fireplace Mortar 63, 63B, & 63G

Once fire cured, fireplace mortar is as strong as the firebrick itself. Use to patch fireplace fireboxes, bond firebrick to firebrick and re-point fireplace brick in the firebox. Temperature rating: 2000°F. Requires heat to cure, may be painted once heat cured.

Rutland Dry Mix 211

Dry mix cement, just add water. This refractory mortar mix meets or exceeds all the requirements of the NFPA. Use to join or repair masonry flue tile or as a parge coating for building fireboxes and building masonry flue liners. Coverage: 10 lb covers 1,268 sq. in. 1/8" thick or 50 clay tiles. Temperature rating: 2550°F. Not for outdoor use. Does not require heat to cure. Acid resistant. Dark gray color, may be painted once dry.

PAIL (10 LB)
RU211: $32.29

Rutland Refactory Cement 611

Pre-mixed cement for masonry to masonry repairs 1/8" to 1/4" thick. Use to set, coat or repair firebrick in fireboxes. Temperature rating: 2000°F. Requires heat to cure. Buff color, may be painted once heat cured.

(1 GAL)
RU611: $38.58

Rutland Castable Refactory Cement 601

Dry Mix cement, just add water. Sets and dries as hard as firebrick. Use to cast custom shapes, replace worn-out firebrick or fill large holes in masonry firebox or as a solid stone bed. May also be used to build or repair outdoor fire pits. For outdoor use, temperature rating: 2200°F. Does not require heat to cure, minimum 24 hr dry time. Gray color, may be painted when dry. 12 ½ lbs casts a block 12" x 12" x 1 1/2".

(25 GAL)
RU601: $66.32

Rutland Stove Gasket Cement 77

The original. Use to Adhere all types of gasket materials to airtight stoves and make metal to metal or metal to masonry repairs. Temperature rating: 2000°F. Requires heat to cure. Black.

SQUEEZE TUBE (2.3 OZ)
77: $4.90

Rutland Stove Gasket Cement 77E & 78

The perfect easy squeeze cement for quick gasket repairs. Use to adhere fiberglass gasket to cast iron and steel. Temperature rating: 2000°F. Requires heat to cure. Black.

SQUEEZE TUBE (2.3 OZ)
77E: $5.18

CARTRIDGE (10.3 OZ)
78: $5.39

National Chimney Chimney Top Adhesive

10.5 oz. cartridges, used to secure multi-flue caps to the crown. Exterior use only.

(10.5 OZ)
NCCTA: $8.79

SaverSystems CrownPrep

For use as a bonding coat on difficult to treat chimney crowns, CrownPrep will insure that your crown repairs will adhere and last.

(1.5 GAL)
SSCP: $35.29

Concrete & Masonry Patch

A weather-resistant mortar and patching material for use in repairing broken mortar in chimneys, steps, windowsills, sidewalks and foundations. May be applied at temperatures below freezing if cartridge is warmed for gunning. Dries to a hard, tough weather-resistant finish in a natural concrete color.

(10.3 OZ)
89: $7.14

Super 3000 Cement

A premium quality super duty grade mortar which has become an industry standard. Use this to bond masonry to masonry, to set firebrick or parge new smoke chambers. This is an air/heat setting mortar that can withstand temperatures up to 3000°F. Super 3000 cement covers an average of 5 sq. ft. per gallon when applied at ⅛" to ¼" thickness. Available in two types, Parging is thicker, containing grit and troweling has a brick setting consistency.

PARGING (55 LB)
SUPER3000P: $89.65

TROWELING (55 LB)
SUPER3000T: $82.84

No. 7 Wet or Dry Roof Patch

All weather formula promotes adhesion and sealing to asphalt, composition, metal roofing and masonry surfaces. Use to patch worn roofing, seal flashing, gutters, downspouts and eaves. Seal around ventilators and skylights. Use around cornices and roof edges.

510: $2.63

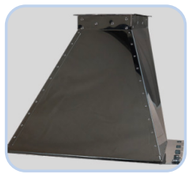

HeatShield® PriorFire® Retrofit Fireplace System

SIZE OPTIONS

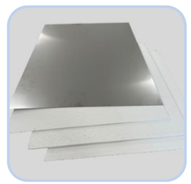

The HeatShield® PriorFire Retrofit Fireplace System (patent pending) is a lab tested, field proven, engineered fireplace. Because of its unique shape, materials, and “Air Wing” over-fire air injection system, it produces more heat, fewer emissions, and a tall “fun to watch” flame when compared to a traditional masonry fireplace.

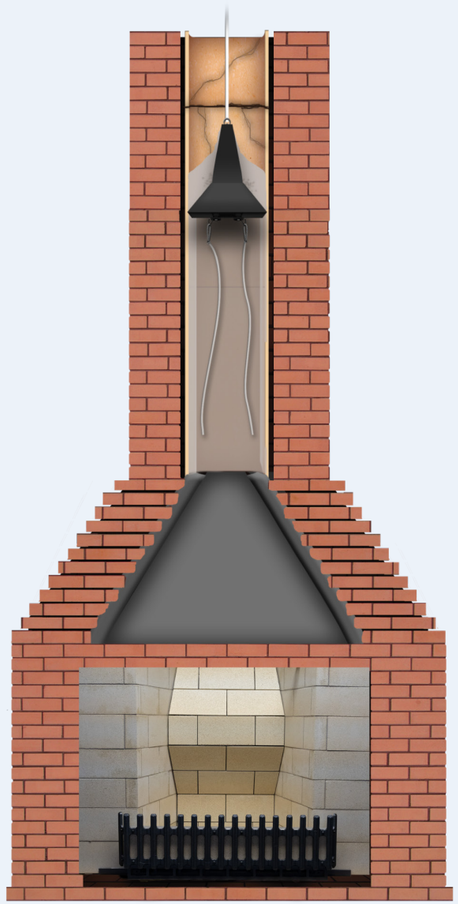

PriorFire Smoke Dome

The PriorFire Smoke Chamber Dome makes it easy to transition the PriorFire Retrofit to an 8” liner. It’s made from durable 20ga 304 series stainless steel and only weighs 27 lbs. Because of its compact size, less demo work is needed when compared to other retrofit smoke chamber domes. Insulation wrap & stainless steel liner not included.

Hearth Floor Reduced Clearance Insulation Kit

The Hearth Floor Reduced Clearance Insulation Kit provides additional materials and insulation that can be added to the existing insulation and floor components when the existing hearth floor is less than 4” and greater than 2 1/2”. It is UL Listed Zero-inch clearance to combustibles with 2 1/2” masonry floor.

PriorFire Retrofit Fireplace Original	**SSPFRF**	$3,799.00

Rutland

SweepsAll™ Brushes

SweepsAll™ Brushes have tough acid resistant nylon bristles for use on masonry or metal flues. The brushes are especially suited to cleaning offset chimneys and flues relined with M-Flex pipe where creosote is not a problem. Soft floppy bristles allow the brush, regardless of size, to fit most standard flues and will not damage or score liners. Brushes have Torque Lock Connectors. Use these brushes with ProFlex™ rods.

A. W. Perkins Rods

ButtonLok™ connectors provide state of the art quick connects for power sweeping, deglazing and tile breaking. Easy to connect and disconnect speeding the sweeping process. To power sweep, connect the ButtonLok™ Drill Adapter to the rods and your choice of the various cleaning heads. A. W. Perkins also makes and sells threaded rods as shown in the chart here. Adapters allow mixing of old tools and brushes with new rods.

Black Poly Rods "Buttonflex" - with ButtonLok™ Ends

These tried and true rods are available in many lengths and two diameters. The 2' version is used with the Smoke Chamber spin brush. The ¾" diameter to 3' long rod is good as a more flexible leader rod or to use for smaller diameter stove and insert flues where the added stiffness is unnecessary. The ⅞" rods are stiffer to traverse longer distances or to deliver torque to the whip in larger flues without flopping around like more flexible rods.

Fiberglass ButtonLok™ Chimney Brush Rods

are .440 and .480 diameter. The rods are for use with Heavy Duty ButtonLok™ brushes. Adapters to convert old rods are available. Not for use with our drill adapter; these rods could shatter.

Steel Enforcer™ rods are used for rotary deglazing and tile breaking. Use with our chain or cable whips (AWP7245 or 7255) or with one of our tile breakers.

1/2" Superflex Nylon Rods

Both items are solid white rods used for stove and insert chimneys up to 8". The economical Superflex Nylon Rods are available in 3' and 5' lengths with enough flexibility to use through thimbles and clean out doors. New Slick rods are the same flexibility but the plastic is slippery, so there is less friction when multiple bends are encountered. The material also takes heat and cold better giving them a longer life and much improved cold weather performance. Slick Rods available in 3' length only. Used most frequently with Mini-Medusa, AWP7260.

Wohler USA Viper Chimney Cleaning System

HANDY VIPER

REGULAR VIPER

MINI VIPER

The Viper is the ideal way to clean prefab or medium to large chimneys. Weighs only 12 lbs. Simply uncoil or retract the 50' or 65' rod. The Handy Viper is a smaller version, at only 4 lbs. You can clip it onto your belt. This is a great way to clean those small to medium sized chimneys. The Handy Viper comes with a 50' cable. The Mini Viper has 50', 4.5 mm dia. rod, and comes with a folding handle and belt clip and weighs just 2.5 lbs. Brushes not included with vipers.

VIPER 50 FT	**VIPERSM:** $567.69

Threaded Brush (Order brush 2" larger than flue) There are three main types: PEK brush, poly perlon brush with nylon bristles, and spring-steel flat wire. The items with the M5 thread are for use with the mini viper. The M10 thread is for the large viper, handy viper, and small viper. The only M5 thread brush is a PEK brush which can be used for any of our stainless steel liners, pre-fab chimneys, dryer vent, or duct cleaning. M5 thread is for MiniViper only.**The M10 threaded brushes for the large, small, and handy viper are available in all three types.** The PEK and poly perlon are great for cleaning stainless steel liners, pre-fab chimneys, dryer vents, and ducts. The Spring-Steel Flat Wire threaded brush (M10 thread) is for cleaning clay flue tile or masonry chimneys.

SMARTSCAN: $500.00

Includes phone holder and 2 Larry Lights. Phone and tablet not included

A. W. Perkins Ro-Vac™ Vacuums

The 1 Motor RoVac is powerful yet light at under 20 lbs. This handy vac comes with a standard 3” x 12' hose & 1 ½” hose and accessories. Great for stove and fireplace servicing, now with a new 2-stage motor rated 110” CFM and 122” water lift. Its new SootStop pre-filter and MicroBag filter stops 99% of dust, and the HEPA filter stops what does get through. It rolls on (5) non-marking casters or can be carried. Exterior shell is available in plastic or stainless steel.

Use one, two, or all three motors depending on the vent size and air flow need with the 3 Motor RoVac. Rated at 405 CFM and 70” water column suction, this vacuum is pound for pound the most powerful vacuum available, yet quiet at only 78 db. It provides extraordinary dust collection as well as unmatched debris pickup. The new SootStop dacron pre-filter may be used to stop 98% of debris and is essential for servicing of oil or coal flues. Its large, washable micro coated bag filter stops almost all the rest of the particles in a typical dust stream, the tiny amount remaining is stopped by the HEPA filter.

You can get your 3 Motor vacuum with a removable tank on a cart or with a fixed trolley, in either case they have 12” rear wheels (with lifetime warranty) and locking 5” front casters. Each includes SootStop dacron pre-filter, micro coated filter, HEPA cartridge filter, 3”x12’ heavy duty gray hose with swivel connector, 1 ½” x 8' hose with swivel connector and (2) 18” extension wands, 1 ½” accessories (tool adapter, brush, crevice & floor tools) and 4” x 10’ heavy duty dust hose with wear strip.

Ridge Hooks

These hooks fit any ladder with 12” rungs and secures it over the ridge of the roof. Available with wheels (rolling) or without (flat). Ridge Hooks can help minimize the chance of damaging your customer’s roof and provide safe climbing. Price is for a single hook.

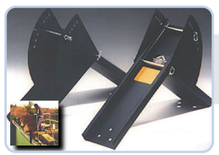

ROLLING
LLFLH-C: $48.00

FLAT
LLFLH: $39.38

Ultimate Ridge Hooks

Ultimate Ridge Hooks are a pair of reversible, adjustable, steel brackets that straddle the roof ridge and allow you, via 2” x 8” base planks, to attach chimney/roof brackets or custom built stage on either or both sides of the ridge - without any roof penetrations. Made of powder coated, 14ga steel. Ultimate Ridge Hooks are rated for 1,750 lbs. on a 12 pitch roof. All hardware and a set-up guide included. A YouTube video is on the website: **Ultimateridgehook.com.**

ULTIMATE RIDGE HOOK
ULRH: $276.92

Ladder Levelers Xtenda-Leg™

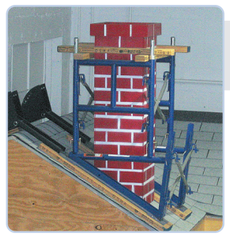

Essential for working safely on uneven surfaces. Level a ladder in seconds with unlimited adjustment positions. Simply squeeze spring loaded locking plates, then allow the leg to extend or retract. Optional replacement feet contains (2) rubber feet.

LADDER LEVELERS	**LL600:** $137.09
REPLACEMENT ORANGE FEET	**LL604:** $50.89
REPLACEMENT LOCKING CAPS & SCREWS	**LL804-1:** $38.00

Chimney Bracket

Serves as a “starter” platform to level off sloped roof so 5’ wide scaffold frames can be erected around chimney construction or chimney repairs. It is adjustable to most roof angles. Chimney Bracket includes: (2) brackets and (1) B74 brace. Can be used with Ultimate Ridge Hooks.

BRACKET
LLCB: $977.23

Hoist Arm & Wheel

Hook the 12” diameter wheel onto the tubular framed hoist arm. The hook is equipped with a safety latch and entire assembly is zinc plated for rust protection. Use a maximum rope diameter of 1”. We stock ropes with hook in 3/4” diameter x 60 ft or 100 ft length. (All sold separately.)

HOIST ARM	**LLHA:** $164.92

DrySafer Lint Alarm

Detect dangerous lint build up before it causes damage, potential injury, or death.When a dryer’s airflow becomes restricted because of excessive lint build up, it can cause the dryer to overheat and possibly result in a fire. DrySafer Dryer Lint Alarm checks insufficient airflow inside the dryer’s exhaust ducts and internal lint filter housing.

DRYSAFER SENSOR
DSLA: $34.95

Barger Clean Sweep Insert Puller

Insert Pullers are being used by chimney professionals across the country for their day-to-day operations. Removing a fireplace insert is strenuous work that may require more than one person. With a Clean Sweep Insert Puller, it’s an easy one man job.
To use, simply adjust the puller to the height of the hearth extension using the adjustable legs. The legs will allow adjustment from the floor to 17” high. Once in place, slide the insert onto the rolling platform, and roll it back out of your way.
The Clean Sweep Insert Puller features solid construction with replaceable roller bearings that ensures it will last for many years. It’s rated at an 800 lb. capacity, yet only weighs 27 lbs. The puller measures 18” wide, 49 ½” long, 2 ½” high, and the legs store within the frame. The Clean Sweep Insert Puller is easy to carry and stores easily in your service truck.

Specifications:

Overall Width: 18”

Overall Length: 49.5”

Legs: 16”

Weight: 27 lbs

Adjustment: From floor to 17” high

Capacity: 800 lbs

Rolling platform has full travel of the frame and is removable for bearing replacement. Legs are fully universal and store within the frame of the puller. Frame rails and rolling platform are angled at the end for sliding under insert.

SWEEP INSERT PULLER
BEIP: $492.31

A. W. Perkins

Chimfex Fire Suppressant

Chimfex is indispensable as the first line of defense in controlling a fire in a chimney. An independent test lab reports that it suppresses a fire in an average of 22 SECONDS! It is an easy to use and effective means in controlling a chimney fire without water damage. Toss it alongside the fire, close the door and air intake vents, and the smoke emissions from Chimfex will rise up the flue to replace the oxygen. Use in a wood stove, fireplace or insert.

CHIMFLEX
AWP3412: $23.60

Arbortech AS175 ALLSAW Masonry Restoration Kit

The new generation Allsaws functionality has been significantly enhanced. In accordance with OSHA regulations, the ALLSAW has been tested and proven to be significantly below the crystalline silica standard when operated with the Heavy Duty Dust Boot and a HEPA certified vacuum. This package includes General Purpose Blades, Plunge Blades, Headjoint Blades. a Dust Boot, a Heavy Duty Dust Boot, lan Key, Spare Blade Bolts (x4), and an Arbortech Carry Bag. With an improved motor and belt, this is an essential tool for trade applications. 13 Amp Tool has been highly enhanced for better performance with a more powerful motor and extended brush life, which enables a more seamless cutting experience. Heavy Duty Triple V Belt and a more efficient power transmission allows for a longer life and faster cuts. Vibration Reduction Handle further enhances ergonomics, allowing for extended use.
Weight: 9.51b

PAYMENT TERMS

For your initial order, you must pay using a Money Order, a Certified Check, or a Credit Card.

New customers will receive a Welcome Packet containing a credit application. We ask that you complete it fully, and mail it back to the address on the credit application. Your credit application will be processed as soon as it's received, and you will be notified by mail of your approved credit status.

We accept Cash, Money Orders, Debit Cards, and Credit Cards (Visa, Mastercard, Discover, American Express). We will also accept Checks and Check By Fax; however, any returned checks will be assessed a $50 service charge.

All past due accounts are subject to an interest charge of 1.5% per month (18% interest annually). We reserve the right to place any account that is past due on credit hold, COD, and/or Certified Funds Only—without prior notification—until the account is made current.

SHIPPING

Orders can ship via FedEx, FedEx Ground, Common Carrier / LTL, and National Chimney's Delivery Truck. Some orders must ship by common carrier; we reserve the right to ship your order via freight, if necessary.

RETURNS

All product must be returned in "like-new" condition, in the original packaging—unless it was damaged upon arrival. If the packaging is damaged, please do not accept the shipment. If only part of the order is damaged, please note precisely the damage on the bill of lading for the carrier. Call your Customer Service Representative to explain the reason for the declined/unaccepted item(s). We will provide you with an RMA number and determine how and where the items will be returned.

Item(s) returned may be subject to a restocking fee. Special orders and custom items are non-refundable and non-returnable—unless damaged during shipping.

CREDITS

All products will be inspected upon receipt. At that time, we will decide whether a credit is due or a restocking charge is applicable. We reserve the right to accept or deny the product, according to its re-sale value.

Items in less than sales worthy condition, unless previously discussed (such as damaged items), will not be credited.

Returned items which can be re-sold will be credited to your account. A copy of the credit memo invoice will be mailed to you. If the returned items were paid for with a credit card, credit will be issued to that card. If you paid COD, a refund check will be mailed to you with a copy of your credit memo invoice. If you currently have net terms, your account w ill be credited and that amount can be deducted from your next payment.

GIVING BACK TO *OUR COMMUNITY*

Sweep Away Cancer

At National Chimney, we are deeply committed to giving back to our community, which is why we are proud to be founders and the largest contributors to Sweep Away Cancer.

Run by a board of chimney professionals, this non-profit organization raises money and awareness for individuals affected by cancer, many of whom are part of the chimney industry, veterans, and first responders. We invite you to join us in this meaningful cause and make a difference in the lives of those battling cancer. Together, we can Sweep Away Cancer and bring hope to those who need it most.

Sweep Away Cancer

Join us in May for the Sweep Away Cancer Rally in Vienna, VA!

GET INVOLVED

- Buy apparel for your team members or customers.
- Ask your customers if they would like to donate.
- Donate a percentage of your company's proceeds from the month of October.
- Attend a Sweep Away Cancer event.

To learn more, visit www.sweepawaycancer.com

Warrior Horse

We also donate a percentage of our profits to Warrior Horse.

Warrior Horse offers a transformative equine therapy program called the "Bonding Process" for U.S. military veterans diagnosed with PTSD. This personalized, interactive approach is provided free of charge to veterans, aiming to kickstart their recovery after active duty.

"They protected our way of life. It's time that we help them get their lives back."

Warrior Horse ★ Horses ★ Healing ★ Hope
